BUILD NOTES · FOR OLIVER

TradeSura — Front Screen (W0)

Final changes to the welcome screen

Issued 30 September 2026 · Matt Wood

Thanks for the new build. The front screen is looking really good and the **logo lockup is spot on**: the ring with "TradeSura" is the approved brand, so keep it exactly as it is. Below is the final set of changes for this screen.

Visual fixes

1. **Background photo is too dark**
   Lighten the overlay on the upper half so the engineer, tablet and kitchen are clearly visible, as on the design. Keep the darker gradient only behind the headline and text so they stay readable.

2. **"CARE PLAN PLATFORM" in bold**
   Same spaced lettering and blue colour, just a heavier weight.

3. **Logo slightly bigger**
   Scale the ring and wordmark up by about 15–20%. Same position, still left-aligned.

4. **"Your trade. On plan." slightly bigger and in bold**
   Same colour.

5. **"every month." one font size larger**
   Only those two words in the headline; keep the green. The rest of the headline stays as it is.

6. **Dash on the £9.60 line**
   Change "£9.60 - every month" to a long dash: "£9.60 — every month". This line stays where it is, under the three chips.

Additions to drive sign-ups

7. **New earnings line**
   Directly under the paragraph "Sell your own care plans at the end of the job…":

   Just 10 customers = £96 a month — £1,152 a year.

   Slightly larger than the paragraph above, in white, with the yearly figure in bold. "£96" and "£1,152" in the brand green (money).

8 **Main button text**

Change to:

Start now — it's free forever

One line.

---

9 **Line under the main button**

Small text, centred, in white or soft grey:

Takes 2 minutes · Free Verified badge + welcome pack

Not green: green is reserved for money across the app.

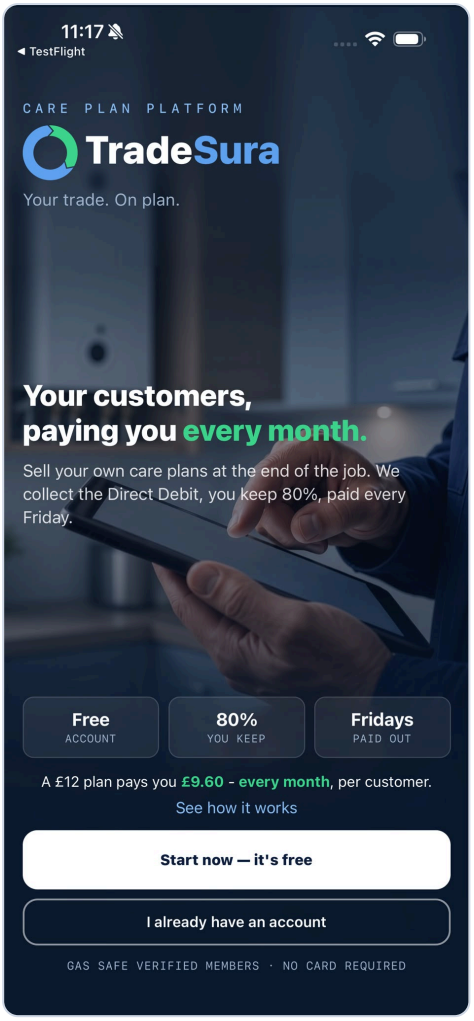

---

10 **Stripe badge above the footer**

The official white "Powered by Stripe" badge (SVG attached, preview below). Centre it and make it **clearly visible, about 40% of the screen width**, sitting alone with generous space above and below so it reads as a trust mark, not small print. Use the file exactly as supplied, with no recolouring, stretching or redrawing.

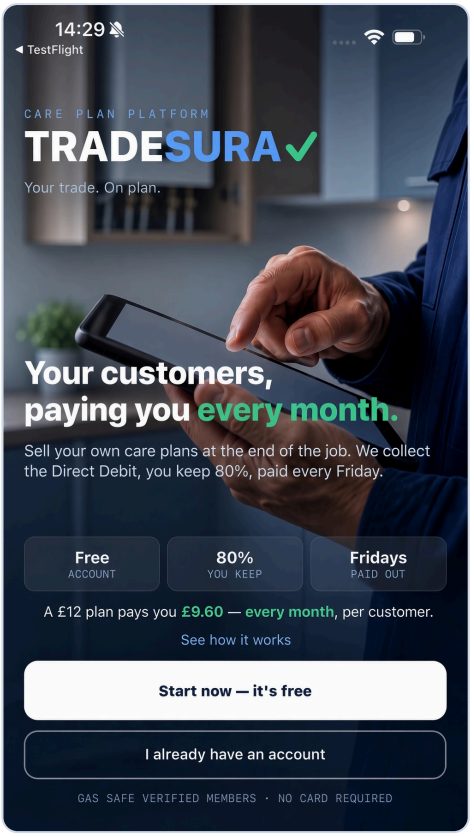

Priority reminder: these are quick tweaks. Slot them in alongside the **plan builder, which stays the top priority**. Push to TestFlight when done and Matt will check it on his phone.

Reference: current build vs design

Current build

Correct logo and layout. Photo too dark.

Design target

Use for photo brightness only. The old TRADESURA✓ logo here is outdated, so keep your current ring logo.

Stripe badge (item 10)
